RETORT ROOM ACCESSORIES

Removes excess water from cans

Allpax is a retort manufacturer that also builds a wide range of integrated robotics, automated material handling and auxiliary equipment for the retort room. The TIPPER is one of our designs that makes the retort room a more efficient and safer place to work.

SOLUTIONS

A typical retort process for cans cooks with steam and cools with water. Both of these processes deposit water on the container lids and on the divider sheets. This pooling of water can cause discoloration and rust spots on your cans. Excess water on the divider sheets also causes problems at the unloader. The Allpax TIPPER is a self-contained basket-tipping system, that is designed to tip the retort baskets, removing excess water.

FEATURES AND BENEFITS

- Available in single and multiple basket-load models
- Basket loads up to 4000 pounds per basket
- Severe-duty design and components
- Hydraulic operation
- Proximity sensors for operator safety
- Push button or automated operator control
- 304 stainless steel construction
- Designed for a wide range of basket sizes
