

SHAKA RETORTS

HIGH SPEED AGITATION

Opens the door for new and improved shelf stable products

The Shaka process paves the way for new products in the shelf stable market. A short thermal burden equals increased nutritional value and dramatic enhancements to taste, texture, and color which means stove top product quality at shelf stable costs.

FEATURES AND BENEFITS

- Reduced cycle times and batch flexibility
- Market differentiation with new innovative products
- Reduced utility consumption
- Opportunity for new shelf stable product development and value added brands
- Flexibility for multiple containers types
- Automated basket loading and clamping options
- Standard batch retort production layout and operation
